## Headway Guitars... Japan's Finest Acoustic

Headway Guitars were first created in the 1970s in Matsomoto, Japan. This region has been known for some of Japan's most famous woodworkers and luthiers. Although the company went through a variety of changes, Headway Guitars are still handmade and are designed with the world's players in mind.

Headway Guitars has been training some of Japan's best luthiers and has been supplying the Japanese retail market with extraordinary acoustic guitars. Finally, in 2008, with almost a decade of absolutely stable production & supply to the best acoustic shops and players in Japan, Headway Guitars is introducing its acoustic instruments to the United States, Canadian, and European markets.
